VQA test | yes/no | (a) both correct, swap follows partner
Q: Is this a blender?

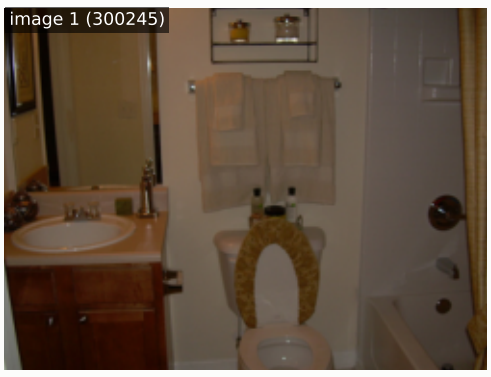

canonical: yes
correct image: 'yes'
swap (sees image 2): 'no'

canonical: no
correct image: 'no'
swap (sees image 1): 'yes'

VQA test | yes/no | (b) identical answers under correct images
Q: Is there a separate shower and tub?

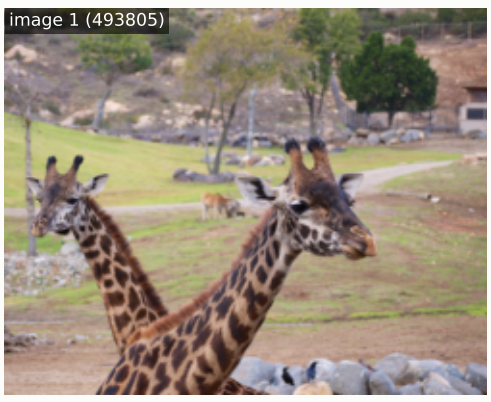

canonical: no
correct image: 'yes'
swap (sees image 2): 'yes'

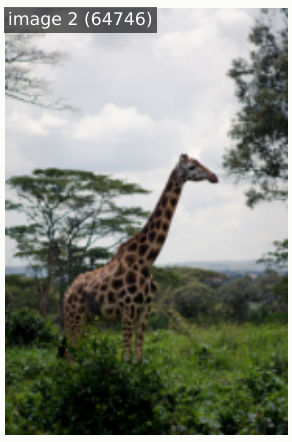

canonical: yes
correct image: 'yes'
swap (sees image 1): 'yes'

VQA test | number | (a) both correct, swap follows partner
Q: How many giraffes?

canonical: 2
correct image: '2'
swap (sees image 2): '1'

canonical: 1
correct image: '1'
swap (sees image 1): '2'

VQA test | number | (b) identical answers under correct images
Q: How many pictures are hung on the wall?

canonical: 4
correct image: '1'
swap (sees image 2): '1'

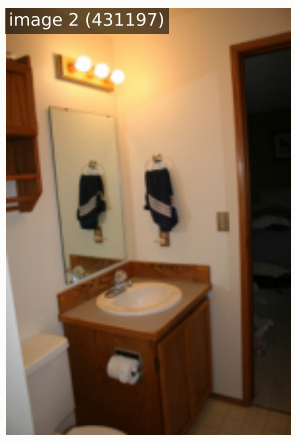

canonical: 1
correct image: '1'
swap (sees image 1): '1'

VQA test | other | (a) both correct, swap follows partner
Q: What room is this?

canonical: kitchen
correct image: 'kitchen'
swap (sees image 2): 'bathroom'

canonical: bathroom
correct image: 'bathroom'
swap (sees image 1): 'kitchen'

VQA test | other | (b) identical answers under correct images
Q: Which Cincinnati neighborhood is this bus going to?

canonical: mt airy
correct image: 'cincinnati'
swap (sees image 2): 'cincinnati'

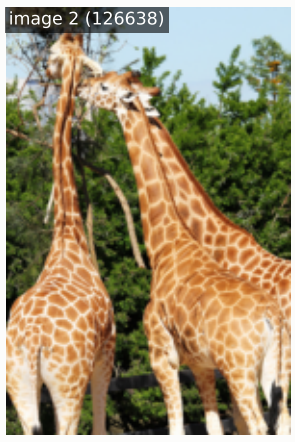

canonical: hyde park
correct image: 'cincinnati'
swap (sees image 1): 'cincinnati'

Grounding test | presence | (a) both correct, swap follows partner
Q: Does this image contain a bus?

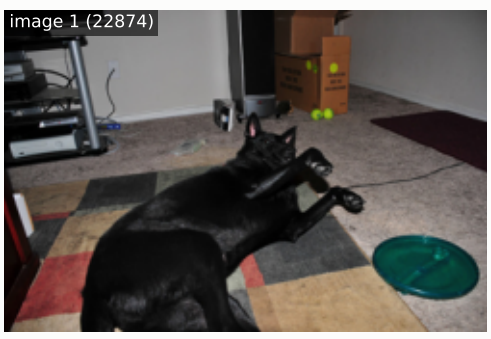

canonical: yes
correct image: 'yes'
swap (sees image 2): 'no'

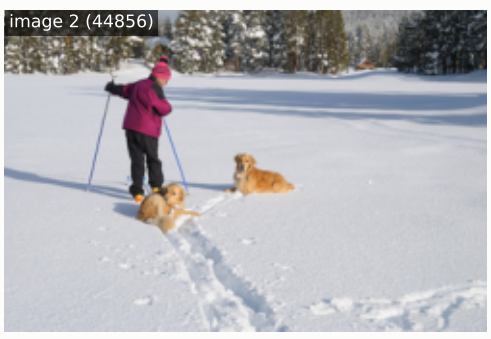

canonical: no
correct image: 'no'
swap (sees image 1): 'yes'

Grounding test | counting | (a) both correct, swap follows partner
Q: How many dogs can you see?

canonical: 1
correct image: '1'
swap (sees image 2): '2'

canonical: 2
correct image: '2'
swap (sees image 1): '1'

Grounding test | counting | (b) identical answers under correct images
Q: How many sinks can you see?

canonical: 1
correct image: '1'
swap (sees image 2): '1'

canonical: 2
correct image: '1'
swap (sees image 1): '1'
